# Create a Link to a Page on Your Website

You can create a link to any page on the internet you can browse to. But there is a nice easy way of linking to pages on your website specifically.
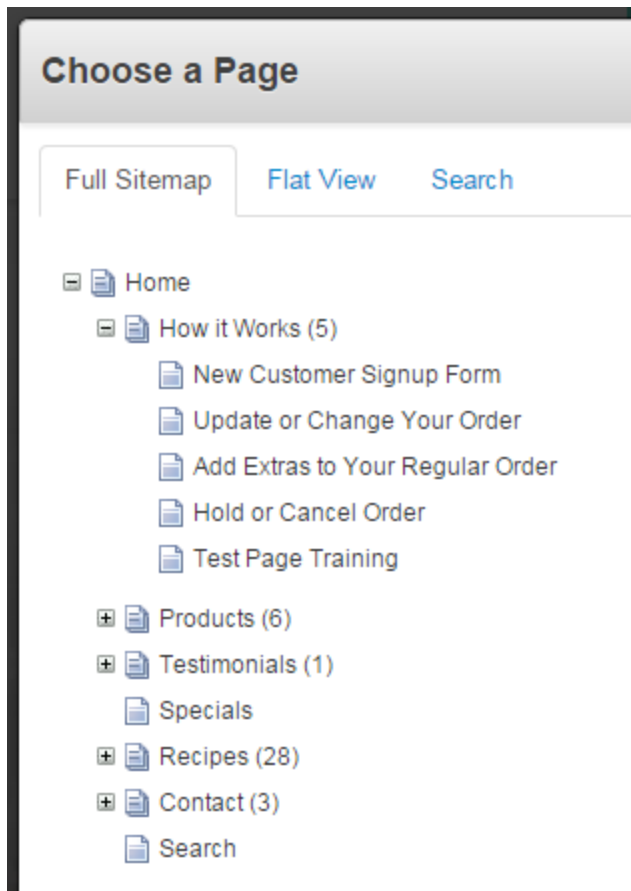

- Select the link text (the text people will click on), or click on an image to select it.

- Then click on 'Insert Link to Page' from the link tab above the editing toolbar.

- From the sitemap select the page you want to link to.

Choose a Page

Full Sitemap   Flat View   Search

- Home
  - How it Works (5)
    - New Customer Signup Form
    - Update or Change Your Order
    - Add Extras to Your Regular Order
    - Hold or Cancel Order
    - Test Page Training
  - Products (6)
  - Testimonials (1)
  - Specials
  - Recipes (28)
  - Contact (3)
  - Search

Linking to a page not on your website is done through the link button on the toolbar. Refer to the help document on creating a link to an external page.
